YAJASH KHAMAR

Ahmedabad, Gujarat, India | yajashkhamar@gmail.com | +91 6354689136 | GitHub | LinkedIn

EDUCATION

Bachelor of Engineering (B.E.), Computer Engineering *2024–2028 (Expected)*

Lok Jagruti University, Ahmedabad, Gujarat | Current Semester: 5

Academic Performance: Sem 3 SPI: 9.92/10 | Sem 4 SPI: 9.48/10

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, SQL

Web Development: React.js, Node.js, Express.js, Django, Django REST Framework, HTML5, CSS3, Tailwind CSS, Bootstrap

Databases: MySQL, MongoDB

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Power BI

Geospatial Technologies: Leaflet, Rasterio, GeoTIFF, NDVI/NDBI/NDWI/LST analysis

Tools & Concepts: Git, GitHub, REST APIs, Data Structures & Algorithms, OOP, DBMS, JWT authentication

PROJECTS

HeatShield AI GitHub | Live Demo

Python · Django REST Framework · React.js · Rasterio · Leaflet · GeoTIFF

Originally built for the Bharatiya Antariksh Hackathon 2026 (ISRO, powered by Hack2skill)

- Built a geospatial platform analyzing urban heat risk across 5 Indian cities from satellite-derived NDVI, NDBI, NDWI, and LST data, using Rasterio to serve GeoTIFF heat-risk overlays on Leaflet maps through a Django REST API.
- Implemented a rule-based recommendation engine that maps index thresholds to prioritized actions — tree plantation, cool roofs, water-body restoration, heat alerts — plus multi-city comparison and report export.
- Deployed the React frontend on Vercel and the Django backend on Render, configuring environment variables and debugging frontend–backend communication.

StudyPulse AI GitHub | Live Demo

MongoDB · Express.js · React.js · Node.js · Tailwind CSS · Google Gemini API

- Developed and deployed a full-stack study planner (React on Vercel, Express API on Render, MongoDB Atlas) with user accounts, task and exam management, calendar scheduling, recurring tasks, priority filters, and CSV export.
- Integrated the Google Gemini API into an AI study assistant for planning, exam preparation, and practice quizzes, and built Recharts analytics dashboards with study-streak tracking and a Pomodoro focus timer.

SkyCast Analytics GitHub | Live Demo

HTML5 · CSS3 · JavaScript · Open-Meteo API · Chart.js

- Built and deployed a weather analytics dashboard using the Open-Meteo API, with city autocomplete, geolocation, hourly and 7-day forecasts, and four interactive Chart.js charts for temperature, humidity, precipitation, and wind.
- Added light/dark/system themes, saved locations, persistent search history, and PDF report export (jsPDF), with cached city lookups to reduce redundant API requests.

Shrine Consultancy Website Live Demo

React.js · Vite · Bootstrap · EmailJS

- Built and deployed a responsive multi-page website for a family-owned accounting and tax consultancy, presenting its information, services, and industries with an EmailJS-powered contact form for visitor inquiries.
